

Figure 2 displays three bar charts showing the relative abundance of 10D and 10DL bacterial taxa for three classes: KO_10D_Fecal, WT_10D_Fecal, and cKO_10DL_Fecal. The y-axis represents 'Relative abundance' from 0.00 to 0.05. The x-axis lists 10D and 10DL taxa. In the KO_10D_Fecal chart, 10D taxa are more abundant than 10DL taxa. In the WT_10D_Fecal chart, 10DL taxa are more abundant than 10D taxa. In the cKO_10DL_Fecal chart, 10DL taxa are more abundant than 10D taxa. Horizontal lines indicate the mean relative abundance for each class.
