## Genus

- |                             |
|-----------------------------|
| Streptococcus               |
| Rothia                      |
| Prevotella                  |
| Schaalia                    |
| Veillonella                 |
| Gemella                     |
| Granulicatella              |
| Haemophilus                 |
| Fusobacterium               |
| Porphyromonas               |
| Parvimonas                  |
| Actinomyces                 |
| Neisseria                   |
| Stomatobaculum              |
| Alloprevotella              |
| Leptotrichia                |
| Lancefieldella              |
| Peptostreptococcus          |
| Mogibacterium               |
| Oribacterium                |
| Treponema                   |
| Lachnoanaerobaculum         |
| Peptococcus                 |
| Peptostreptococcaceae_[G-9] |
| Solobacterium               |
| Other                       |
