

Group006  
 D Final -PMA  
 E Final -PMA

- Granulicatella adiacens
- Veillonella parvula
- Fusobacterium periodonticum
- Veillonella atypica
- Streptococcus salivarius
- Streptococcus parasanguinis\_parasanguinis\_clade\_721
- Neisseria perflava
- Veillonella rogosae
- Neisseria flava
- Neisseria flavescens
- Campylobacter concisus
- Porphyromonas pasteri
- Aggregatibacter aphrophilus
- Eikenella corrodens
- Streptococcus parasanguinis\_clade\_411
- Streptococcus gordonii
- Streptococcus sanguinis
- Neisseria subflava
- Veillonella tobetsuensis
- Gemella sanguinis
- Leptotrichia sp.\_HMT\_215
- Fusobacterium nucleatum
- Neisseria elongata
- Rothia mucilaginosa
- Streptococcus sp.\_HMT\_066
- Streptococcus cristatus\_clade\_578
- Schaalia odontolytica
- Streptococcus australis
- Veillonella denticariosi\_dispar\_parvula
- Veillonella dispar
- Neisseria mucosa
- Streptococcus mitis
- Streptococcus oralis\_subsp\_tigurinus\_clade\_071
- Streptococcus oralis\_subsp\_tigurinus\_clade\_070
- Streptococcus sp.\_HMT\_064
- Klebsiella aerogenes
- Raoultella planticola
- Enterobacter asburiae
- Enterobacter mori
- Enterobacter mori\_nov\_97.951%
- Rothia dentocariosa
- Salmonella enterica
- Enterobacter cancerogenus
- Streptococcus oralis
- Klebsiella pneumoniae
- Pseudomonas aeruginosa
- Haemophilus parainfluenzae
- Veillonella dispar\_parvula
- Citrobacter koseri
- Streptococcus sp.\_HMT\_423
