

The figure consists of two side-by-side bar charts. The left chart is titled 'class: MTB_D1' and the right chart is titled 'class: MTB_D29'. Both charts share a common y-axis representing frequency, with horizontal grid lines at intervals of 100, ranging from 0 to 1000. The x-axis for both charts represents 1000 random words, with a vertical line separating the two distributions. In the MTB_D1 chart, several words have high frequencies, with the highest bars reaching approximately 1000. In the MTB_D29 chart, the distribution is much sparser, with most words having a frequency of 0 and only a few words having non-zero frequencies, mostly below 100.

class: MTB_D29
