

A complex network diagram with a central hub-and-spoke structure. The diagram features two concentric circles of nodes. The inner circle has 12 nodes, and the outer circle has 24 nodes. Each node in the inner circle is connected to a corresponding node in the outer circle by a straight line. Additionally, there are numerous edges connecting nodes within the same layer and between different layers, creating a dense, interconnected network. The nodes are represented by small yellow circles, and the edges are thin black lines. The overall shape is roughly circular, with the nodes and edges radiating outwards from the center.
