

The figure is an NMDS plot with 'NMDS1' on the x-axis and 'NMDS2' on the y-axis. The x-axis ranges from -1.0 to 1.0, and the y-axis ranges from -0.5 to 0.5. Two groups of data points are shown: red and teal. The red points are clustered in the center-right area, while the teal points are clustered in the center-left area. Two ellipses are drawn around the clusters: a red ellipse for the red points and a teal ellipse for the teal points. The ellipses overlap significantly, indicating that the two groups are not well-separated in this 2D space.
